1 Introduction

1.1. Overview

1. The North Eastern region comprises eight states namely, Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura. The total geographical area of the region is 2, 62,179 sq. km. which is nearly 8% of the total area of the country. In terms of population, the region has 39 million which is approximately 3.8 % of the total population. The region, though rich in natural resources, remains one of the most economically backward regions in the country. The overall growth rate in the region has remained low over the past and has been characterised by lack of infrastructure facilities and basic amenities. The per capita income in the region in the year 2013-14 was INR. 46,354 which was much below the national average of INR. 74,380. More than 38.3% people in the region are living below poverty line (BPL) – a figure that is higher than the national average of 26.1%.

1.2. Project Description

2. Guwahati the capital city of Assam is the 'Gateway to the North-East' and 'Logistic and Infrastructure Hub' for the region in true sense. The city is very important destination point in terms of India's, security and strategic point of view: main hub for the trade, commerce, tourism and transit with ASEAN and East Asian economies. The exponential growth over the years has created enormous pressure on land, infrastructure and transportation network of the city primarily on South Bank of the city. This necessitates expansion of the city to North Bank with proper bridge connectivity over river Brahmaputra.

The Hon'ble Finance Minister, Assam in his Budget Speech 2017-18 announced the construction of two bridges across river Brahmaputra, one connecting Pan Bazar to North Guwahati and another connecting Palashbari to Sualkuchi for which a Budget allocation of Rs. 100 crore was made for construction of these bridges.

The proposed bridges will result in time saving for commuters, reduction in atmospheric pollution, and reduction in accident rates, reduced fuel consumption, reduced vehicle operating costs and increase in the average speed of road vehicles. These projects will serve in a great way for development in social, economic, health, education and all other aspects of life of the people of Assam as well as the neighbouring states.

M/s SMEC India Pvt. Ltd. (wholly own subsidiary of SMEC Australia presently owned by Surbana Jurong) has been engaged to conduct Feasibility and Detailed Project Report for two bridges across river Brahmaputra.

Bridge at Bharalumukh : The project road will take off from a place nearby Pan bazar so that the AT road on the southern bank of Brahmaputra River will be connected with NH-31 on the northern bank of the river Brahmaputra through a six lane bridge over the river.

Bridge and Approach Road	Existing Chainage North Guwahati		Design/Proposed Chainage		Length (Km)
	From	To	From	To	
South Bank Approach	KM 0.000	KM 1.300	0.0000	KM 1.300	
Bridge Length & Viaduct	KM 0.000	Km 2.700	KM 0.000	Km 2.700	2.700
Existing Road cum Approach Road	KM 2.700	KM 6.800	KM 2.700	KM 6.800	4.100
Total Length					6.800

Table - 0.1: Project Road sections

Sl. No	Particulars	Proposed (Design)
Technical Features		
1.	Proposed Project	Consultancy Services for Preparation of Feasibility study & DPR for Two Bridges over River Brahmaputra connecting Pan bazar to North Guwahati
2.	State and District	State Assam District Kamrup and Kamrup Metropolitan
3.	Length	North Guwahati Total – 0.000 to 6.800 km Length of Bridge – 1.600 km

Sl. No	Particulars	Proposed (Design)
Technical Features		
4.	Proposed Carriageway	6-lane dual Carriageway
5.	Proposed Right of Way	80meter
6.	Total number of affected villages	Total – 5 Villages
7.	Junctions	3 Major
8.	ROB	1 (New ROBs proposed adjacent to all existing ROBs)
9.	Major Bridges	1 nos. (New for 6-lane),
10.	Minor Bridges	1 minor bridge
11.	Culverts	4 culverts
12.	Service Road	Service road of 4.100 Km length along the project roads.
13.	Truck Lay Bye	1 nos.
14.	Bus Bay	4 nos.
15.	Foot Path	Provided on either side of carriageway.
16.	Drainage	Road side drains have been proposed throughout the project stretch.

Sl. No	Particulars	Proposed (Design)
Technical Features		
17.	Slope protection	River Bank Bridge approaches and high embankment greater than 3 metre has been protected by slope protection.
19.	Land Acquisition	Private land: 29.96 Ha (North Guwahati) Government Land: 7.9 Ha.
18.	Total Cost of the project	INR 1925 Crores
Environmental & Social Features		
1.	Forest Land Diversion	Nil
2.	River/Channel crossings	1 major
3.	Ponds	2 nos. of impacted ponds
4.	Terrain	Mostly plain and rolling terrain along section
5.	Quantity of waste generation	Municipal solid waste : About 0.19 tonnes/day from labor camps
6.	Existing trees within ROW of 80m	500
7.	Compensatory plantation	Three times the trees cut has been proposed as Compensatory Plantation. (Approx.5000 trees)

Sl. No	Particulars	Proposed (Design)
Technical Features		
8.	Green belt development	As per IRC SP 21:2009 /MoRTH Code/Guidelines
9.	Cropping pattern	Kharif and Rabi crops are grown in North Guwahati. Paddy is the main crop in the project area.
10.	No. of project affected persons (PAFs) & (PAPs)	Total PAFs – 219 Total PAPs – 1095
12.	Resettlement Action Plan (RAP) Budget	Will be provided later after valuation of properties on ground.

Fig-1:- Location Map

1.3. Objective of the Resettlement Plan

4. This Resettlement Action Plan is prepared to deal with impacts of land acquisition and resettlement issues resulting from the rehabilitation of the said road project. The Plan provides an analysis of the impacts, identifies the nature and types of losses, and establishes an entitlement matrix as a guide to payments for compensation and resettlement benefits. The primary objective of this short RP aims to mitigate the adverse social impacts caused by the project such as structure loss (partly or fully), loss of livelihoods and of other assets including restoration of the income and living standards of the affected persons (APs) due to land acquisition within a short period of time without any disruptions in their own economic and social environment.

2. Impacts

5. The implementation of the project is likely to have social impacts due to construction of Bridge and approach road and during construction of road. To minimize the social impacts, necessary and adequate measures were taken by the executing agencies to avoid impacts within the corridor specified under proposed bridge. Selection of final route has been made based on alternate route survey and the best option was included in the DPR. While selecting the best route all possible options from engineering, Soil, social and environment point of view were reviewed to get a prior idea on probable impacts and their mitigation measures likely to be because of the proposed project interventions. Though Bridge and approach road for project does not cause any major adverse impact on the asset and land, but precaution by doing this operation during off season has been assured during project implementation stage. Table2.1 gives summary of impacts assessed due to implementation of sub-project and rerouting at one stretch.

Table2.1: Summary of Impacts

Sl.No	Impacts Description	Unit	Quantity	Type of Impact
1	Affected Household available	No.	219	Direct/ Permanent
2	Affected person population	No.	1095	Direct/ Permanent
3	Total land requirement	Ha.	30	Direct/ Permanent
4	Loss of structure	No.	148	Direct/ Permanent
5	Vulnerable Affected Person	No.	66	Direct/ Permanent

1.1. Land Requirements

6. The land being acquired for the project are of various types such as Residential (24B-01K-10L), Agricultural (198B-04K-13L) and Commercial/Industry (04B-02K-17L) The total land is to be acquired for the project (227B-04K-0L (Approx. 30 Ha. The Area is presented in the Table 2.2.

1.2. Project Affected Person

7. As per the socio-economic census survey a total of 219 HH were identified as affected households. Census survey identified 219 households makes 1095 affected persons that will be affected due to the RoW of bridge and approach road for a length of 6.800 kms.

1.3. Impacts on Structure and CPR's

10. There has been some impacts on private structures and common property resources were identified within corridor of proposed alignment.

1.4. Restrictions on Use of Land

11. The stretch has relatively prosperous Agricultural land on either side of the highway. Acquisition of land will result in loss of crops. As land will be acquired in a phased manner, the owners will be able to cultivate some part of their land till construction time permits. They will be allowed to harvest produce and cash compensation will be paid for crops acquired at a price fixed by the Government.

1.5. Income Restoration and Rehabilitation

12. The impacts due to construction of bridge and Approach road would have been significant. This could have significant impact on affected person's economic condition due to less production of crop or losing livelihood source. The project has taking cognisance of these factors and people apprehension, and project authority decided to schedule the stringing of transmission line after harvesting of crops. This change in construction schedule, would avoid significant damage to standing crops (paddy, etc.) within corridor, thereby, minimising the impact on livelihood source of agricultural labours identified during census survey and prevented degradation of their economic condition. The impact due to the sub-project will be permanent and significant.

15. If any affected person has been left out inadvertently or were not present during socio-economic census survey, on producing of supporting document, such case will be considered for assistance as per the provisions of Resettlement Framework.

3. Socio Economic

State Profile

16. Assam is popularly hills. It is situated in the geographical area of longitude and 24° 8' N to Indian landmass and 29.92

called as the land of the red river and blue North East region of India, covering 78,438 sq. km between 89° 42' E to 96° E 28° 2' N. It represents 2.39 per cent of the per cent of the Northeast. It came under

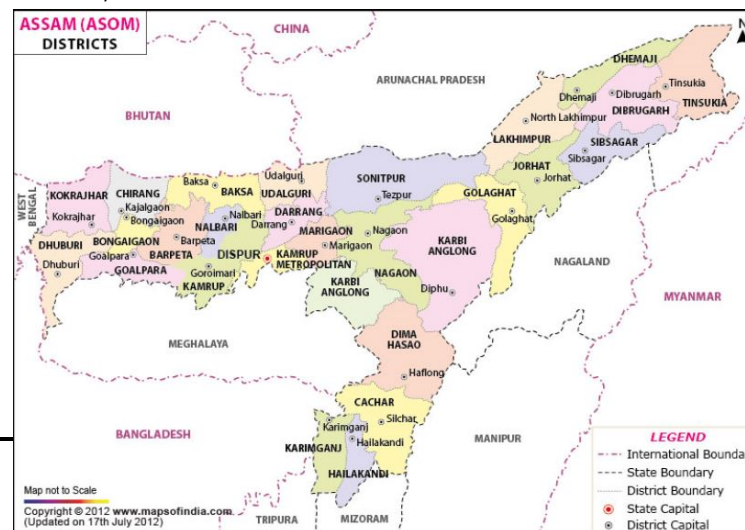

Fig 3.1: Map of Assam

Company through Treaty of Yandabo in 1826 and was a British province after 1838. After 1947, it became a state of the Union of India known as Assam. The state has 27 administrative districts, which are further divided into 49 sub-divisions and has around 26,247 villages. It is the gateway to states of Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, and Tripura. Moreover, the state shares the international borders with countries of Bangladesh and Bhutan at south and north respectively.

13. The Brahmaputra and Barak river valley is the dominant physical feature of Assam. The Brahmaputra River is Assam's antecedent river and functions as its lifeline too. The river enters the state from Arunachal Pradesh and makes the agricultural area of the state more fertile.

14. Numerous tribal groups have travelled to Assam through different routes as the land was connected to several states and countries. Negritos, Dravidians, Alpines, Tibeto Burmese and Aryans had been the major races that came and dwelled in ancient Assam. They were considered as the aborigines of Assam and even today they are an integral part of the Assamese diasporas. The largest population in Assam is that of the Tibeto Burmese descent known as the Bodo tribe and Mishing tribe. Major tribes of Assam make out their livelihood through agriculture and by selling their handicrafts. Different types of tribes living in Assam are famous nationwide for their wide variety of handicrafts, handloom and pottery works. The languages of the Assamese tribes too differ according to their places of origin. Bodo Tribes are one of the earliest tribes that had settled in Assam. They are, however, not restricted to any specific area of the state and are found in almost all parts of Assam. They practice cultivation, tea plantation and poultry farming. Rabha is a scheduled tribe of Assam, belonging to the Indo Mongoloid descent and has resemblance to the Bodo tribe. Karbi tribe, also known as Mikir, usually dwells in the hilly areas of Assam, especially in the North Cachar Hills, Nagaon and Sonitpur districts of the state. On the other hand Mishing Tribe hails from Tibeto Burmese and inhabits the districts of Tinsukia, Sibsagar, Sonitpur, Jorhat and Golaghat, along the banks of River Brahmaputra. Dirugarh and Tinsukia district of Assam, along DihingRiver are the settlement areas of Phake Tribes. The Dimasa Tribe lives in the KarbiAnglond District of Assam. The Lakher tribes of Assam consist of Hawthai, Zuchnanag, Tlongsai, HeimaSabeu and Lialia groups. One can also find a concentration of the Deori tribal community in Assam only in the nearby regions of the BrahmaputraRiver. Khamti Tribes, Naga Tribes and Santhals are also some of the oldest tribal groups of Assam. Lalung tribal community is one of the important tribal communities that have resided in Assam. Besides these the Singpho tribes of the Tinsukia district of Assam also form an important Assamese tribal group. Cumulatively, around 115 ethnic groups are present in the state and currently have 23 notified tribes. Bodos tribe contribute to 40.9% of the tribal population in the state.

15. The economy of Assam is overwhelmingly agricultural and produces nearly half of the country's total Tea production. Agriculture sector continues to support more than 75 percent population of the State directly or indirectly providing employment of more than 53 percent¹ of the total workforce. As per Economic Survey (2012-13) report of Assam net per capita income at constant (2004-05) prices stands at Rs. 22910 and at current prices is Rs.37250 in the year 2011-12. Assam is very rich in natural resources. The abundant water resources in the State form the potential for irrigation and generation of hydroelectricity. Its forests too are the storehouses for quality timber. However, much of the natural resources still lie unused and explain the economic backwardness of the State.

20. Hinduism is the major religion in the state, with 64.89% of the population following the religion. Muslims make up 30.92% of the population, Christians 3.7%, and Buddhists 0.08% and Sikh 0.19%. Major languages spoken in the State are Assamese, Bodo and Bengali. Table3.1 provides an overview of state's profile.

21. The state shows improvement in social development status and is reflected from the finding based on comparison of census data of 2011 and 2001 (Table3.2) in the following paragraph.

Table3.2: Assam State Social Indices based on Census 2001 and 2011

Sl.No	Description	2001	2011
1	Total State Geographical Area km ²	78,438	78,438
2	Approximate Population (crore)	2.67	3.12
3	Actual Population	26,655,528	31,205,576
4	Male	13,777,037	15,939,443
5	Female	12,878,491	15,266,133
6	Population Growth (%)	18.85	17.07
7	Sex Ratio	932	958
8	Density/km ²	340	398
9	Total Child Population (0-6 Age)	4,498,075	4,638,130
10	Male Population (0-6 Age)	2,289,116	2,363,485
11	Female Population (0-6 Age)	2,208,959	2,274,645
12	Child Sex Ratio (0-6 Age)	845	962

17	Male Literacy (%)	75.23	77.85
18	Female Literacy (%)	51.85	63.00
Source: http://www.censusindia.gov.in			

22. Important facts based on comparison of social development indices like population growth, sex ratio, child sex ratio, literary rate, female literacy rate, etc. of census 2011 and 2001 data of the state are;

- i. The decadal population growth has come down to 17.07% in census 2011, compared to 18.85% in census 2001;
- ii. The household size in the state of Assam is 4.9 as per census 2011;
- iii. Assam literacy rate is 72.19% (census 2011) and holds 26th position in this regard among the Indian States. The literacy rate (72.19%) shows improvement in census 2011 compared to 63.5% in census 2001. The improvement in literacy rate is marginal in case of male population, but is significant for female population standing to 63% in census 2011 compared to record 51.85% in census 2001. The overall literacy rate of the state is at par with recorded national value (72.99%) in census 2011;
- iv. The population density (398 person/km²) has also increased in census 2011 compared to recorded 340 person/km² in census 2001. This indicator is on

higher side than the recorded national value of 382 person/km² in census 2011;

- v. The overall sex ratio in the state has improved to 958 during census 2011 from 932 in census 2001. The state is doing better in comparison to corresponding national sex ratio of 933 (census 2011);
- vi. Child sex ratio (0-6 age group) recorded is 962 as per census 2011 that is a major improvement over census 2001 value (845). This is better compared to corresponding recorded national value (919) in census 2011, indicating lesser discrimination against female child in the state;

23. The above important findings accentuate improvement of social development in the state in 2011 over census 2001 recorded status.

1.1. District Profile

24. The proposed bridge project is in Kamrup and Kamrup Metropolitan districts of Assam. The district is situated entirely on the North Bank and South Bank of the river Brahmaputra. The districts kamrup and kamrup metropolitan covers an area of 3,105 sq. km and 955 sq.km respectively. And the district, along with Nalbari and Barpeta together form the Kamrup region, has Kamrupi culture and language. The Districts profile is given below in table no.3.3

1.1.1 Population Growth

25. According to the 2011 census Kamrup district has a population of 1,517,202, roughly equal to the West African country of Gabon or the US state of Hawaii. This gives it a ranking of 327th in India (out of a total of 640).[7] The district has a population density of 436 inhabitants per square kilometre (1,130/sq mi). Its population growth rate over the decade 2001-2011 was 15.67%. Kamrup has a sex ratio of 946 females for every 1000 males, and a literacy rate of 72.81%. The district has people belonging to various indigenous Assamese communities like Keots/Kaibarta, Bodo, Rabha, Tiwa/Lalung, Amri Karbi, Dom/Nadiyal, Koch-Rajbongshi etc. Kamrup District is divided into two parts Kamrup and Kamrup metropolitan,

1.1.2 Sex Ratio

26. Increase in the district sex ratio is observed in census 2011 when compared with 2001 census. The sex ratio of Kamrup and Kamrup Metropolitan district is less than state sex ratio recorded in 2011 census. The child sex ratio i.e. 946 of Kamrup Metropolitan and is less than to state, where as 967 of Kamrup district is less greater to state child sex ratios during same census (2011) period.

1.1.3 Literacy

27. The state literacy rate has increased to 72.19% in 2011 from 63.25% recorded in 2001 census. Based on comparison with 2001 census, whereas literacy rate of Kamrup metropolitan is 88.71% in 2011 and 83.21% in 2001 similarly literacy rate of kamrup district is 75.55% in 2011 and 67.73% in 2001.

1.1.4 Population Density

28. The population density of the Kamrup and kamrup metropolitan districts is more than the state recorded value in 2011 census. The kamrup metropolitan population density has increased to 1313 people/km² in 2011, whereas kamrup district population density increased to 489 of census 2011, an increase of 18% and 15% over 2001 census recorded value.

Sl. No	Description	Assam	Kamrup		Kamrup Metropolitan	
		2011	2011	2001	2011	2001
1	Total Population	31,205,576	1,517,542	1,311,698	1,253,938	1,059,578
2	Male	15,939,443	778,461	678,310	647,585	571,774

1.2 Socio-economic Census Survey

1.2.1 Brahmaputra Bridge

31. The development of proposed project envisaged impacts that may be directly or indirectly on the people living or having assets within the defined 'Project Impact Area'. These impacts may be permanent or temporary in nature with varying magnitudes that might be significant or insignificant on affected people social and economic condition. In order to establish an inventory of the affected people and assessment of likely impacts due to proposed development, a detailed socio-economic survey was carried out during 10th April to 17th April, 2018.

The identification of project affected people was limited to Project Impact Area, which is the Right of Way (RoW) required for construction of new bridge and approach road i.e. from South Bank to North Guwahati. Proposed sub-project is spread across 5 villages. The RoW of the technically finalized realignment sections

has been superimposed on the revenue map to identify survey numbers coming within the RoW, leading to identification of affected people. The verification of the survey numbers and land record has identified. Hence, the census survey was carried out through 'Census Survey Format' for 219 affected household (Table 3.4). "Census Survey Format" prepared details out detailed socio-economic information to be collected to assess the status of the affected persons as well as their ensuing losses. The Census Survey Format is enclosed in **Annexure 1**.

32. The census survey was also supplemented by public consultations to capture affected people perceptions about the project and resettlement options. The Bridge and Approach road traverses through agriculture fields, community land, private land and commercial fields have been identified. The details of summary of responded HH and Socio-Economic Census Survey Data are providing in table no. 3.4 & 3.5 respectively.

1.2.2 Households

33. The socio-economic survey has excluded people with age lower than 14 years; as a result, the household size of affected household couldn't be worked out. But, based on average household size of the district that is 5.5 (primary census survey), it can be articulated that affected households has accessibility to resources to sustain a fair living condition.

42. The Assam state poverty threshold estimated for 2009-10 as per Ministry of Development for North Eastern Region is Rs. 691.7 monthly per capita for rural area and Rs. 871 monthly per capita for urban area. The details are provided in Table3.12.

Table3.12: State Specific Poverty Line for 2009-2010

Source: <http://www.mdoner.gov.in/content/report-studies-ner> (MDoNER, Govt. of India)

1.2.3 Vulnerable Groups

43. The vulnerable groups include STs, SCs, OBCs WHH and have low ascribed social status and more remoteness of their traditional lands while WHH and BPLs are vulnerable in terms of economic backwardness, deprivation of capabilities and gender biases present in both societies and governments. According to the Planning Commission of India the percentage of people living below the poverty line in Assam went up to 37.9 per cent in 2009-10 compared with 34.4 per cent in 2004-05.

The census survey findings reveals that out of 66 affected families, 20 families belong to SC, 6 families belong to WHH(Women Headed Household), 33 families belong to ST and 7 belong to OBC families.

4 Legal Frameworks and Review

44. Public Works Department (Assam), Government of Assam, finalized the "Resettlement Policy Framework (RPF)" and shall be posted on PWD Website. The finalized "Resettlement Policy Framework (RPF)" shall apply to this project roads under PWD. This Resettlement Policy document describes the principles and approach to be followed in minimizing and mitigating negative social and economic impacts caused by the project. Overall objective of this Framework is to guide the preparation and implementation of National Policy based on the following principles:

Take due care of Project Affected People (PAP).

- Take due precautions to minimize disturbance to human habitations, tribal areas and places of cultural significance.
- Involve affected people from inception stage to operation and maintenance.
- Consult affected people in issues of PROWs, land acquisition or loss of livelihood
- Encourage consultation with communities in identifying environmental and social implications of projects.
- Pay special attention to marginalized and vulnerable groups and secure their inclusion in overall public participation.
- Guarantee entitlements and compensation to affected people as per its RFCTLARRA 2013.
- Share information with local communities about environmental and social implications.

4.1 The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013

45. The Act lays down procedures for estimating fair compensation of the affected families (and not just the titleholders) due to land acquisition, rehabilitation and resettlement. The Act prohibits acquisition of multi-cropped irrigated land as a special provision to safeguard food security, unless in exceptional circumstances as a demonstrable last resort. The new land acquisition acts come into force from January 1, 2014. The Act replaced the Land Acquisition Act, 1894, a nearly 120-year-old law enacted during British rule.

The salient features of the acts are;

- Giving priority to the interests of farmers, landless labourers, dalits and farmers, the Act concerns only such cases where the land will be acquired by Central or State Authorities for any public purpose.
- Before the acquisition of any land, the Government is required to consult the concerned Panchayat or Municipal Corporation and carry out a Social Impact Assessment in consultation with them.
- The Act provides a transparent process for land acquisition for industrialization, development of essential infrastructural facilities and

urbanization by giving adequate financial compensation to the affected person.

- Laying down special provisions for food security, the Act under Section 10 provides that multi-crop irrigated land will not be acquired except as a demonstrably last resort measure and wherever the same is done, an equivalent area of cultivable wasteland shall be developed for agricultural purposes. States are also required to set a limit on the area of agricultural land that can be acquired in any given district.
- It also provides for leasing of land to developers, instead of sale, so that the ownership will remain with the original land holders and they can also have a regular income by way of lease rent; the terms of lease to be laid down by the State Government according to type of land, location, market rates etc.
- It provides for the establishment of National Monitoring Committee for rehabilitation and resettlement at the Centre as well as State and Land Acquisition, Rehabilitation and Resettlement Authority for speedy disposal of cases.
- The Act prescribes a punishment of six months imprisonment in case of contravention of any provision relating to payment of compensation or rehabilitation and resettlement and of six months or one lakh rupees fine for providing misleading or false information or documents.
- It also provides for the temporary occupation and use of any waste or arable land for a period of not more than three years for public purposes by the Government.
- The Act has provisions to provide fair compensation to those whose land is taken away, brings transparency to the process of acquisition of land to set up factories or buildings, infrastructural projects and assures rehabilitation of those affected.

46. The new RFCTLARR Act, 2013 replaces the Land Acquisition Act, 1894, a nearly 120-year-old law enacted during British rule. The section 24 new acts clearly describe the situation when the provision of LA, Act 1894 has to be followed and when the provision of RFCTLARRA 2013 will come into effect.

47. **Section 24 RFCTLAA Act, 2013 says:**

(1) Notwithstanding anything contained in this Act, in any case of land acquisition proceedings initiated under the Land Acquisition Act, 1894 -

- (a) Where no award under section 11 of the said Land Acquisition Act has been made, then, all provisions of this Act relating to the determination of compensation shall apply; or
- (b) Where an award under section 11 has been made, then such proceedings shall continue under the provisions of the said Land Acquisition Act, as if the said Act has not been repealed.

(2) Notwithstanding anything contained in sub-section (1), in case of land acquisition proceedings initiated under the Land Acquisition Act, 1894, where an

award under the said section 11 has been made five years or more prior to the commencement of this Act but the physical possession of the land has not been taken or the compensation has not been paid the said proceedings shall be deemed to have lapsed and the appropriate Government, if it so choose, shall initiate the proceedings of such land acquisition afresh in accordance with the provisions of this Act, Provided that where an award has been made and compensation in respect of a majority of land holdings has not been deposited in the account of the beneficiaries, then, all beneficiaries specified in the notification for acquisition under section 4 of the said Land Acquisition Act, shall be entitled to compensation in accordance with the provisions of this Act.

4.2 Applicability of Legal Frameworks

58. The need for construction of Brahmaputra Bridge and its approach road from South Guwahati to North Guwahati project Resettlement Plan report have already been described in Paragraph 1.5 of Section 1 in the report. The updated RP has to be consistent with provisions of legal frameworks enforce in the country. An analysis has been carried out to identify Acts, Rules and Regulations triggered and its extent of applicability due to impacts assessed at one rerouted stretch of Brahmaputra Bridge. The below Table 4.1 summarizes the applicability of various legal frameworks.

Table 4.1: Applicability of various Legal Frameworks

SI.No.	Acts, Notifications and Policies	Relevance to this project	Applicability
1	Assam Land (Requisition and Acquisition) Act. 1964	Land required for the project shall be acquired as per the provisions of this act.	Applicable
2	Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013	Compensation and Resettlement and Rehabilitation benefits will be applicable as per this Policy.	Applicable

5 Entitlements, Assistance and Benefits

5.1. Eligibility and Cut-off-Date

59 APs entitled for compensation or assistance provisions under the Project are:

- All APs losing land either covered by legal title/traditional land rights status;
- Tenants and sharecroppers whether registered or not;
- Owners of buildings, crops, plants, or other objects attached to the land; and
- APs losing business, income, and salaries;

60. Compensation and assistance eligibility will be limited by a cut-off date to be set for the sub-project. The land requirements are temporary in nature and no acquisition of land has been proposed. Hence, the day of the beginning of the

socio-economic census survey i.e. 10th -17th April 2018 will serve as the cut-off date. APs who settle in the affected areas after the cut-off date will not be eligible for compensation and assistance. They, however will be given sufficient advance notice, requesting to vacate premises creating encumbrance during project implementation.

1.2. Entitlement Matrix

61. The core involuntary resettlement principles for the Program to be followed for each sub-projects are: (i) land acquisition, and other involuntary resettlement impacts will be avoided or minimized exploring all viable alternative sub-project designs; (ii) where unavoidable, time-bound resettlement plans (RPs) will be prepared and APs will be assisted in improving or at least regaining their pre-program standard of living; (iii) consultation with APs on compensation, disclosure of resettlement information to APs, and participation of APs in planning and implementing sub-projects will be ensured; (iv) vulnerable groups will be provided special assistance; (v) payment of compensation to APs including non-titled persons (e.g., informal dwellers/squatters, and encroachers) for acquired assets at replacement rates; (vi) payment of compensation and resettlement assistance prior to the contractor taking physical acquisition of the land and prior to the commencement of any construction activities; (vii) provision of income restoration and rehabilitation; and (viii) establishment of appropriate grievance redress mechanisms.

62. Based on the above broad principles and to align with the requirement set in “the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013”, The Resettlement Policy Framework (RPF) for the project have been updated in August 2014. The RPF detailing description of each compensation measure and assistance for the components is provided in the entitlement matrix. APs will be entitled to a combination of compensation measures and resettlement assistance, depending on the nature of ownership rights of lost assets and scope of the impact, including social and economic vulnerability of the APs.

Table5.1: Entitlement Matrix

Sl. No.	Category	Type of Loss	Entitlements	Details
1	Private Property	Loss of Land (Agricultural, Homestead, commercial or otherwise)	a. Land will be acquired as per Assam Land (Requisition & Acquisition) Act. 1964 and payment of compensation as per RFCTLARR Act. 2013.	Higher of (i) market value as per Indian Stamp Act, 1899 for the registration of sale deed or agreements to sell, in the area where land is situated; or (ii) average sale price for similar type of land, situated in the nearest village or nearest vicinity area, ascertained from the highest 50% of sale deeds of the preceding 3 years; Market value to be multiplied by factor 1.5 (one and half times) for land within the radial

Sl. No.	Category	Type of Loss	Entitlements	Details
				<p>distance of 10 km from the urban area and 2 (Two times) if the radial distance of the land beyond 10 Km from the urban area.</p> <p>Plus 100 % solatium and 12% interest from date of preliminary notification to award.</p>
2	Private Property	Loss of residential structure	<p>In addition to compensation for land and assistance above under sl. No.1</p> <p>a. Replacement value of the structure and other assets as per current PWD scheduled rates with 100% solatium.</p> <p>b. Right to salvage material.</p> <p>c. All physically displaced families will receive one time subsistence allowance of Rs. 36000.00.</p> <p>d. All physically displaced families will</p>	

Sl. No.	Category	Type of Loss	Entitlements	Details
			<p>receive one time shifting assistance of Rs. 50000.00</p> <p>e. All physically displaced families will receive one time resettlement allowance of Rs. 50000.00</p> <p>f. For partially affected structure, additional 25% of structure value will be given.</p>	
3.	Private Property	Loss of commercial Structure	<p>. In addition to compensation for land and assistance above under sl. No.1</p> <p>a. Replacement value of the structure and other assets as per current PWD scheduled rates with 100% solatium.</p> <p>b. Right to salvage material.</p> <p>c. All physically displaced families will receive one time subsistence allowance of Rs. 36000.00.</p> <p>d. All physically displaced families will receive one time shifting assistance of Rs. 50000.00</p> <p>e. All physically displaced families will receive one time resettlement allowance of Rs. 50000.00</p> <p>f. Each affected family having petty</p>	

Sl. No.	Category	Type of Loss		Entitlements	Details
				shop shall get one time financial assistance of Rs. 25000.00 for construction of petty shop	
4.	Private Property	Impact to Tenants	Tenant: Residential	<ul style="list-style-type: none"> a. One month notice to vacate the rental premises b. Rental allowance at Rs. 2000/- per month in rural area and Rs. 3000/- per month in urban areas for six month. c. Shifting assistance of Rs. 10,000/- 	
			Tenant: Commercial	<ul style="list-style-type: none"> a. One month notice to vacate the rental premises b. Rental allowance at Rs. 2000/- per month in rural area and Rs. 3000/- per month in urban areas for six month. c. Shifting assistance of Rs. 10,000/- d. Commercial tenants will receive one time grant of Rs. 25000/- for loss of trade/self employment. 	
			Tenant: Agricultural	In case of agricultural tenants advance notice to harvest crops or compensation for lost crop at market value of the yield determined by the Agricultural Department.	

Sl. No.	Category	Type of Loss		Entitlements	Details
5.	Illegal use of RoW	Impact to Non Title Holder	Encroachers	a. Replacement cost of the affected structure calculated at current PWD scheduled rates without depreciation. b. Right to salvage material. b. Advance notice for harvesting crop.	
			Squatters (Residential/Commercial)	a. Replacement cost of the affected structure calculated at current PWD scheduled rates without depreciation. b. Right to salvage material. c. Shifting allowance of Rs.10,000/- d. Transitional allowance of Rs.12000/- for vulnerable (SC/ ST/ Woman headed / Physically Challenged)	
		Mobile vendor/Kiosk	a. Shifting allowance of Rs.10,000/-		
6.	Loss of Livelihood	Employees of shops, agricultural labourers, sharecroppers etc.		a. Subsistence allowance equivalent to minimum agricultural wages for 3 month. b. Income restoration training programs to eligible Affected household. c. Preferential consideration for project employment during construction.	

Sl. No.	Category	Type of Loss	Entitlements	Details
7.	Impacts on Vulnerable	Vulnerable displaced families (SCs/STs/Women Headed Households/Differently abled families)	<p>a. One time lump sum assistance of Rs.25000/- will be paid above and over the other assistance to vulnerable household.</p> <p>b. Income restoration training programs to eligible Affected household.</p> <p>c. Preferential consideration for project employment during construction.</p>	This will be restricted to title holders only.
8.	Common Property Resources	Community Assets	a. Reconstruction of affected assets.	
9.	Any other impact not yet identified, whether loss of asset or livelihood			Unforeseen impacts will be documented and mitigated based on the principles agreed upon in this policy framework.

6.Compensation and Rehabilitation

6.1 Compensation Strategy

6.1.1 Land

63. In the event of the land being utilized for the establishment of the Bridge and approach road locations an appropriate compensation will be finalized in consultation with the negotiation committee which will comprise of the members as listed below. In order to obtain the private land it is decided to carry out a direct negotiation process with each land owner in place of evoking the land acquisition process as per the land acquisition act. This is being proposed to not only expedite the process but also to reduce conflicts or delays. This process is defined as the direct compensation payment which could also be termed as consent award process - the direct negotiation and mutual agreement between the private land owner and the department. This will help in arriving at the mutually agreed rate of compensation with the land owners, which will eliminate resentment from the land owners regarding rate of compensation. Thus reduce the scope for approaching the civil courts for higher compensation. The composition of the negotiation committee will be:

1. The Deputy Commissioner of the concerned districts who will be the chairman of the committee,
2. The LAO attached to the PMU will be the secretary,
3. ADC (Revenue) and Circle Officers of the concerned circles will be members of the committee,
4. The DGM (PWD, North and South Guwahati Assam) will be the members at executing agency level,
5. The concerned Zilla Parishad officials will also be the member of this committee.

64. The circle value for the land price fixation as per the Department of Registration for different categories of land for the villages along the transmission line corridor will be obtained from the district registrars. This guidance value will be referred to by the negotiation committee. The compensation payment for loss of land paid through negotiation + additional stamp paper and registration cost + 100% solatium² on the negotiated price.

Process of Price Fixation

1. The concerned LAO who is the secretary of the negotiation committee will call for a meeting.
2. The dates for price negotiation will be provided village wise. Negotiation will be conducted village wise by gathering all the land losers at one point in time for negotiation. This is to ensure transparency.

²This has been included in accordance with the Land Acquisition Act 1894 which would ensure not only appropriate compensation package but also a higher value

3. The PMU will provide information on the guidance value of the land to land losers at least one week before negotiation.
 4. Minimum negotiated price will be 1.5 times the circle value.
 5. The negotiation committee will negotiate the price with the land owners.
 6. Based on the decision of the negotiation committee and the approval of the PMU the LAO and the District Commissioner officers will make the payment.
 7. Compensation will be given within 30 days of taking possession and receiving all the necessary documents by the LAO and District commissioners. In case of delay a 9% interest will be given to the beneficiary up to a period of one year after which it will be increased to 15% per annum thereafter (this is as per the provision of the LA Act).
 8. Civil works will start after payment of compensation.
65. Compensation payment process
1. Compensation to be finalized by the negotiation committee with the consent of the land owners.
 2. The award will be approved by the District Commissioners or the LAO (PMU).
 3. All payments should be done through cheques only. The PWD local staff will assist the affected person to open a bank account in case they do not have a bank account.

1.1.1 Crop Damage (Ziraat)

66. As per Entitlement Matrix, the loss of private trees (Table 5.1) shall be compensated based on the timber value at market price and compensation for tea bush, perennial crops and fruit trees at annual net product market value multiplied by remaining productive years. This will be determined in consultation with the Forest Department for timber trees and the other relevant departments for tea plants, fruit bearing trees and perennial crops.

1.1.2 Impacts on Vulnerable AP

67. The vulnerable affected person shall be assisted with one time financial assistance stipulated in S.No.7 of the Entitlement Matrix.

7 Resettlement and Rehabilitation Budget

68. The resettlement cost estimates have been prepared based on the impacts identified in socio-economic survey corresponding to eligible compensation and resettlement assistance as per provisions under the Entitlement Matrix (Table 5.1) in Resettlement Framework already prepared and updated in April, 2018 for the project.

69. The resettlement cost estimates have been prepared based on the impacts identified in socio-economic survey corresponding to

eligible compensation and resettlement assistance as per provisions under the Entitlement Matrix (Table 5.1) in Resettlement Framework already prepared for the project. These are part of the overall project cost. The proposed transmission line is passing through one district having only one circle rates and the unit cost for land and other assets in this budget has been derived through rapid field appraisal, consultation with affected families and relevant government authorities. Contingency provisions have also been made to take into account variations from this estimate.

The components of the resettlement cost include various features such as, compensation for land at their replacement value; compensation for crops; assistance for transitional allowance, shifting allowances and cost for implementation of RP. PWD will arrange in advance in its budget to meet the requirement of land compensation and resettlement cost.

8 Consultations and Disclosure

70. As part of the participatory approach, the project has been designed in due consultation with all the stake holders. Public consultation is highly mandatory for any investment in infrastructural development program. This is an important tool to ensure peoples' participation in the planning and implementation phase of this project. The aim of the public consultation is to make the people aware about the developmental activities being undertaken in their locality and to incorporate their views for making a sustainable plan during the design to the successful completion of the project.

71. Consultations were conducted during the initial stage of project preparation. However, additional consultations were also carried out for the proposed realigned stretch of proposed bridge and approach road as part of the continuous participation during the preparation of this resettlement plan along with various stakeholders that includes concerned officials of the executing agencies, local community and their leaders, and affected persons.

72. During preparation of RP Brahmaputra Bridge and approach road, one round of consultation (Table8.1) was carried out in Gauripur, North Guwahati, Rahdhila, villages on 10th -17th April, 2018&for preparation of the RP. The consultation was limited to one to one interaction with the affected person due to the sub-project. The mode of consultation was informal meeting and one to one interaction. The consultation was conducted with major objectives of;

- Establishing an understanding on overall developmental goals and benefits of the project;
- Understanding the views of the people affected, with reference to use of land and its due compensation;
- Understanding views of people on resettlement options, if any;
- Identifying and assess major economic and social characteristics of the villages to enable effective planning and implementation;
- Resolving issues related to impacts on community property and their relocation, if any;
- Examine APs' opinions on health safety issues during the construction and selection garbage materials or the waste materials;
- Identifying levels and extent of community participation in project implementation and monitoring;
- Developing a thorough coordination between all the stakeholders for the successful implementation of the project;

The participants were mostly affected persons, village leaders, farmers and women of the project area. Minutes and photographs of the consultation are in **Annexure 2 & Annexure 3** respectively.

Table8.1: Details of Consultation Conducted

Sl. No.	Name of the Villages	District	Date of Consultation	Number of Participants
1	Gauripur	Kamrup	10-04-2018	17
2	Gauripur and Abohypur	Kamrup	12-04-2018	13
3	Abhyapur	Kamrup	14-04-2018	18

4.3 Key Findings of the Consultation

73. The key findings of the consultation on various issues such as: general perception about the project, suggestions to mitigate any damage or loss of livelihood are presented below.

- The proposed project will benefit affected people to reduce the travel time to commute from North Guwahati to Pan Bazar..
- Women should also be empowered in the unskilled works of the project.
- The affected peoples also suggested to starting construction works after harvesting of crops.
- People asked about creation and employment opportunities during construction phases of the project.
- Affected people expect a good amount for the loss of their private land because the New Bridge and approach road.

The local community and affected peoples have welcomed the initiative taken by PWD and perceived certain benefits from the proposed investment program, such as construction of new Bridge for better connectivity etc.

4.4 Disclosure

74. The draft RP will be made available in relevant local government agencies and in relevant PWD/PMU and site offices before starts of civil works. The summary RP will be made available in Assamese language. Finalized RP will also be disclosed in PWD's website; and information dissemination and consultation will continue throughout Investment Program implementation. The disclosure process has been on-going depending on the progress of sub-project.

9Grievance Redress Mechanism

75. PWD do not have any specific Environment or Social Safeguards Policy regarding generation/distribution subprojects currently. NDB requires PWD to establish a Grievance Redress Mechanism (GRM) having suitable grievance redress procedure to receive and facilitate resolution of affected peoples' concerns, complaints, and grievances about the subproject's environmental performance. The grievance mechanism will be scaled to the risks and adverse impacts on environment due the subproject type, size, type of area (sensitive area) and impacts. It should address affected people's concerns and complaints promptly, using a transparent process that is gender responsive, culturally appropriate, and readily accessible to all segments of the affected people at no costs and without retribution.

76. The EA and PIU through, respectively, has directed their field units to form GRC at circle level for efficient grievance redress mechanism to assist the APs resolve their queries and complaints. Grievances of APs will first be brought to the attention to the site office level of the IAs. Grievances not redressed by the IA staff (field level) will be brought to the Grievance Redress Committee (GRC). The proposed GRC has representatives from APs, PMU, IA, and ESMU, field level staff, district magistrate/commissioner, local administration, revenue authority and local community. The GRC will constitute of:

i. Concern Project Authority (IA)	Chairman
ii. One official from the O/O the Concerned District Magistrate or SDM (Civil)	Member
iii. Superintending Engineer PMU/PWD	Member
iv. Concerned Circle Officer or his representative	Member
v. Deputy General Manager (PMU), PWD	Member
vi. Environmental & Social Management Unit (ESMU)	Member
vii. Land Acquisition Officer (LAO), PWD	Member
viii. Affected person(s) / GaonBurah	Member

82. The main responsibilities of the GRC are to: (i) provide support to APs on problems arising from the use of their land/property; (ii) record AP grievances, categorize, and prioritize grievances and resolve them; (iii) immediately inform the PMU of serious cases; and (iv) report to APs on developments regarding their grievances and decisions of the GRC and the PMU. Other than disputes relating to ownership rights under the court of law, GRC will review grievances involving all resettlement benefits, compensation, relocation, replacement cost and other assistance.

83. Grievances of affected persons (APs) will first be brought to the attention of the Project head of the PIU. Grievances not redressed by the PIU will be brought to the Grievance Redress Committee (GRC) set up to monitor subproject Implementation for each subproject affected area. The GRC will meet every month, determine the merit of each grievance, and resolve grievances within a month of receiving the complaint—failing which the grievance will be referred to appropriate court of Law for redresses. The proposed mechanism does not impede access to the country's judicial or administrative remedies. The AP has the right to refer the grievances to appropriate courts of law if not satisfied with the redress at any stage of the process. Records will be kept of all grievances received including: contact details of complainant, date the complaint was received, nature of grievance, agreed corrective actions and the date these were effected, and final outcome. The GRCs will continue to function during the life of the Project including the defects liability period.

10 Institution Set-up

1.6. Organization Set-up

77. There should be establishment of PMU which is functional and is responsible for implementing the NDB Phase-1 loan and is also responsible for the preparatory work for the proposed sub project. PWD for construction of new bridge will be the IAs for the proposed investment program.

85. Keeping in view the capacity of PWD and its existing PMU, an Environment and Social Management Unit (ESMU) have been set up within the PMU along with other engineering units to address environmental and social issues of the program, and will be headed by Environmental cum Resettlement Specialist. The ESMU has already been set up who is responsible for the overall coordination of land acquisition and resettlement issues and also responsible for the implementation of resettlement activities. The ESMU is assisted by designated site engineers who will be responsible for the field activities. For the Resettlement Plan, PMU will do the overall coordination, preparation, planning,

implementation, and financing. The EA will ensure that key institutions including local governments are involved in RP preparation, updating and implementation.

Table 10.1: Institutional Roles and Responsibilities for Resettlement Activities

Activity	Responsible Agency
Sub-project Initiation Stage	
Setting up of ESMU and staff	PMU
Finalization of sites for sub-projects	PMU/IA
Disclosure of proposed land acquisition and sub-project details by issuing Public Notice	PMU/ESMU/IA
Meetings at community/household level with APs	ESMU/ESMU/PMU/IA
RP Preparation and Updating Stage	
Conducting Census of all APs	PMU/ESMU/ IA
Conducting FGDs/meetings/	PMU/ESMU
Computation of replacement values of land/properties proposed for acquisition and for associated assets	PMU/IA/ESMU/LAO
Categorization of APs for finalizing entitlements	PMU/ESMU/LAO/IA
Formulating compensation and rehabilitation measures	PMU/ESMU/LAO/IA
Conducting discussions/meetings/consultation with APs and other stakeholders	PMU/ESMU/IA
Fixing compensation for land/property with titleholders	PMU//ESMU/LAO/IA
Finalizing entitlements and rehabilitation packages	PMU/ESMU/LAO/IA
Disclosure of final entitlements and rehabilitation packages	PMU/ESMU/IA
Approval of RP	PMU/ESMU/NDB
RP Implementation Stage	
Sale deed execution and payment	PMU/IA/ESMU/LAO/Appropriate Government/
Taking possession of land	PMU
Implementation of proposed rehabilitation measures	PMU/ESMU/IA
Consultations with APs during rehabilitation activities	PMU/ESMU/IA
Grievances Redress	PMU/ESMU/GRC/IA
Internal monitoring	PMU/ ESMU/IA
External monitoring	External Monitoring Consultant

11 Implementation Schedule

86. Payment of compensation and rehabilitation assistance to all 219 affected HH to be completed.

12 Monitoring and Reporting

87. Monitoring will be the responsibility of the EA (PWD) through its PMU/IA/ESMU. The extent of monitoring activities, including their scope and periodicity, will be commensurate with the project's risks and impacts. PWD is required to implement safeguard measures and relevant safeguard plans, as provided in the legal agreements, and to submit periodic monitoring reports on their implementation performance. NDB will require PWD to:

- establish and maintain procedures to monitor the progress of implementation of safeguard plans;
- verify the compliance with safeguard measures and their progress toward intended outcomes;
- document and disclose monitoring results and identify necessary corrective and preventive actions in the periodic monitoring reports;
- follow up on these actions to ensure progress toward the desired outcomes, (v) retain qualified and experienced external expert to verify monitoring information for projects with significant impacts and risks;
- Submit periodic monitoring reports on safeguard measures as agreed with NDB;

88. The PWD/PMU monitoring will include daily planning, implementation, feedback and trouble shooting, individual AP file maintenance, community relationships, dates for consultations, number of appeals placed and progress reports. Monitoring reports documenting progress on resettlement implementation and RP completion reports will be provided by the PMU to NDB for review. Additionally, NDB will monitor projects on an on-going basis until a project completion report is issued.

3	Toilet			

13 Mobility

13.1 Most frequently travelled place: _____

13.2 Purpose 1 Social 2 Market 3 Education 4 Employment

13.3 Frequency 1 Daily 2 Weekly 3 Monthly

13.4 Distance 1. 0-5 kms 2. 5-10 kms 3. 10-15 kms 4. More than 15 kms

13.5 Travel time: _____

14 Accessibility to facilities

14.1 1. Hospitals/Dispensaries 2. Educational institutes 3. Block Headquarter 4. District headquarter
5. Post Office 6. Market 7. Police Station

14.2 Accessibility to transport facilities

1 Personal 2 Bus 3 Auto 4 Others _____

15 Migration

- 15.1 Do you migrate for work ?
1 Yes 2 No
- 15.2 If 'Yes', for how many days/months in a year? _____
- 15.3 Where do you migrate? 1. Within the District 2. Outside the District 3. Outside the State
- 15.4 What kind of job usually you undertake whenever you migrate?
1 Agricultural Labour 2 Non Agricultural Labour
3 Trade & Business 4 Others (Specify)
- 15.5 How much do you earn? _____
- 15.6 Trend of Migration
1. Once in a year 2. Twice in a year 3. Every alternative year
4. Once in every three years 5. No regular interval/as and when required
- 15.7 At what time of the year do you migrate?
1 Summer 2 Winter
3 Rainy Season

16 Fulfillment of day-to-day requirement

- 1 Market within the village 2 Market within 5 kms 3 Market beyond 5 kms

17 Access to Common Property Resources (CPR)

- 1 Easily accessible 2 Difficulty in access

If Difficulty in access, then the reason _____

18 Health status and facilities

- 18.1 Was any member of your family affected by any illness in last one year?
1 Yes 2 No

- 18.2 If 'Yes', please indicate the details

No. of Cases	Sex		Age (in yrs.)	Type of disease/ illness	Treatment taken 1. Allopathic 2. Homeopathic 3. Ayurvedic 4. Traditional 5. No treatment
	1 Male	2 Female			

- 18.3 Distance travelled to avail the health facilities: _____ kms.

19 Status of Women

- 19.1 Kindly give the following details

Sl.No.	Economic/Non-economic Activities	Engagement in Activities	1. Yes	2. No
1	Cultivation			
2	Allied Activities*			
3	Sale of forest produce			
4	Trade & Business			
5	Agricultural Labour			
6	Non Agricultural Labour			
7	HH Industries			
8	Service			
9	Households Work			
10	Relaxation and Entertainment			
11	*Others (Specify) _____			

* Dairy, Poultry, Piggery, Sheep rearing, Goatry etc.

- If, engaged in economic activities total income of the year, Rs. _____
- 19.2 Time Disposition in different activities of the women folks

Sl. No.	Activities	(in Hrs.)
1	Cooking	
2	Wahing cloths	
3	Fuel foddors	
4	Water collection	

5	Agricultural activities	
6	Job/Service	
7	Child Rearing	
8	Labour work	

19.3 Involvement of women in decision making

Sl.No.	Issues	1 Yes	2 No	Final Decision Taken by: 1. Male 2. Female 3. Consensus
1	Financial matters			
2	Education of child			
3	Health care of child			
4	Purchase of assets			
5	Day to day activities			
6	On social functions and marriages			
7	Local governance			

20 Employment Status

1 Seasonal employment 2 Unemployed 3 Employed throughout the year

21 Coverage under Government Development Schemes

21.1 Have you availed any benefit under any govt. scheme?

1 Yes 2 No

21.2 If 'Yes', kindly give us the following details

Sl. No.	Name of the Schemes	Year	Kind of help*
1	SGRY		
2	JGSY		
3	IAY		
4	FFW		
5	SGSY		
6	IWDP		
7	PMRY		
8			
9			

*1 Loan 2 Training 3 Employment

If '1', kindly indicate the amount Rs. _____

If '2', kindly indicate the type of training _____

21.3 After availing this scheme did your annual income increased?

1 Yes 2 No

21.4 If 'Yes', how much ? Rs. _____

21.5 If 'No', why ? _____

22 Indebtness

Please indicate, your borrowings during last one year :

Sl. No.	Source	Amount taken (in Rs.)	Amount returned (in Rs.)

Public Consultation	
Name of the Sub-project	Ambaragan - N. Guwahati Via Lane Bridge
Name of the Village/s	Gaunipute
Venue	Gaunipute
Date	11/06/18
No. of Participants attended	
Consultation conducted by	
Objectives:	
<ul style="list-style-type: none"> To inform the community about the sub-project To understand their overall socio-economic condition To understand their views and perceptions on project 	
Issues Discussed & Observation made:	

1) Women in the project area are aware of the proposed bridge and approach road and most of the participants welcome the project and appeal to complete the project as soon as possible for better connectivity of North and South Guwahati.

2) The proposed project will be beneficial as because their Agriculture produce will be marketable through this new bridge.

3) The proposed project reduce the transportation cost and people can easily make ~~see~~ bank to another bank. They

4) People will get more job opportunities due to project and more options will be opened for local people.

Public Consultation	
Name of the Sub-project	Pan-Bazar - North Guwahati Sin laung Bridge
Name of the Village/s	Abhayapur
Venue	Abhayapur
Date	13/04/2018
No. of Participants attended:	
Consultations conducted by	
Objectives:	
<ul style="list-style-type: none"> To inform the community about the sub-project To understand their overall socio-economic condition To understand their views and perceptions on project 	
Issues Discussed & Observation made:	
<p>1). The proposed sub project will be beneficial as because at present people commute North Guwahati - South Guwahati by very old bridge or by boat. one is dangerous and another is for more distance. due to construction of Bridge people can mobilize easily and in less time.</p> <p>(ii) affected families are concerned with compensation for their loss and livelihoods and want to know about the rate at which compensation will be paid.</p> <p>(iii) project will give positive impact as getting self dependency.</p>

Public Consultation

Name of the Sub-Project: - Pambasa - North Guwahati Six Lane Bridge
 Name of the Village: Gouipur/Abhyapur
 No. Of Participants 13
 Venue: Gouipur/Abhyapur
 Date: 12-04-18

Issues discussion during Public Consultation

- ① Local people are more happy due to this project because they can easily commute from one end to another end of river and also ~~not~~ reduce travel time.
- ② Project will increase the land value of this surrounding area and people can get good rates of available land.
- ③ people can develop local market and get more job opportunities.
- ④ People Mostly who are getting directly affected, they are more concern about compensation and rate of compensation.

Public Consultation

Name of the Sub-Project: Panbazar - North Guwahati Six Lane Bridge.

Name of the Village: Gramipur

No. Of Participants - 17.

Venue: Gramipur

Date: 10-04-18

Issues discussion during Public Consultation

- (i) People of Gramipur are aware of project and in favour of construction of New Bridge which would become lifeline of the Gramipur.
- (ii) People are more concerned about compensation.
- (iii) Local people should be involved in unskilled works like earth digging and filling during the construction time.
- (iv) BOMDA should provide very high compensation for the affected land so they ~~become~~ the affected families become happy and can establish new business as their choice.
